

## Conservation Centers for Species Survival (C2S2)

### Red Wolf Small Grant Application

Applications are due October 1, 2024. Awardees will be notified January 1, 2025.

Grant Description: Conservation Centers for Species Survival (C2S2) will award up to a total of \$5,000 USD for projects focused on Red Wolf Conservation efforts. Projects can include but are not necessarily limited to field conservation, scientific research, and/or educational outreach. This is a one-time award. C2S2 is unable to provide indirect/administrative costs.

Requirements: Applicants must be employees of an accredited zoological institution or university or an employee/member of a certified non-profit organization. Grant money must be used within two-years of being awarded. A one-page final summary describing the project's outcomes plus high resolution photographs are required within two months of project completion. Upon receipt of the award and upon completion of the proposed project, applicants must provide a brief (less than 200 words) project description with high resolution images that will be used for C2S2 social media purposes.

Applications: Title page, project description (should be no longer than 2 pages of narrative) plus detailed budget (not to exceed one page), single spaced, 12 point font, and 1.0" margins. Applications will be reviewed and awardees selected by the C2S2 Board based upon potential benefit to red wolf conservation efforts and/or species survival. Completed applications and/or associated inquiries should be submitted via email to [info@conservationcenters.org](mailto:info@conservationcenters.org).

Please answer the following questions (***to be included in the two page narrative***):

- 1) Provide a brief overview description of the proposed project including logistical information (location work will take place, specific animals, etc.) and background information describing any similar work that has been completed, and the challenge being addressed (or the question to be answered).
- 2) Please describe the potential conservation impact including impact on individuals, populations, species and any tangential benefits (eg. benefits other species, local economy, etc.).
- 3) Does the project involve the use of live animals? Describe in detail experimental methods proposed; provide evidence of approved Animal Care and Use Protocol.
- 4) Please provide the total requested and complete the provided budget table (add additional rows as needed. Please indicate if the amount awarded will cover all associated costs and if and from whom you have received/will receive additional funds.
